Population Health Overview

The healthcare industry is recognizing that social and non-medical factors play a much larger role than once envisioned.

Determinants of Population Health

- 55% Physical / Social Environment
  (i.e. Living Conditions, Income Level, Community Demographics, Discrimination, Transportation, etc.)
- 25% Lifestyle / Health Behaviors
  (i.e. Activity Level, Eating Habits, Drugs & Alcohol, Smoking, etc.)
- 15% Medical Care
  (i.e. Quality of Care, appropriate Care, Access to Care, and Affordable Insurance)
- 5% Genetics
  (i.e. Gender, Age, Predisposition, to disease / injury, etc.)

Care Cycle

- Symptoms
- Diagnosis
- Care Plan
- Compliance
HOME FOR LIFE Program

HOME FOR LIFE is National Church Residences' progressive plan for helping seniors remain healthy and happy wherever they call home — whether that is an apartment, house, or an independent setting in Senior Living or Affordable Housing.
